-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

1. ☒ The amendment filed on 05 January 2006 under 37 CFR 1.312 has been considered, and has been:
- a) ☐ entered.
 - b) ☐ entered as directed to matters of form not affecting the scope of the invention.
 - c) ☐ disapproved because the amendment was filed after the payment of the issue fee.
Any amendment filed after the date the issue fee is paid must be accompanied by a petition under 37 CFR 1.313(c)(1) and the required fee to withdraw the application from issue.
 - d) ☒ disapproved. See explanation below.
 - e) ☐ entered in part. See explanation below.

The amendment has been disapproved for introducing new matter into the specification. CFR 1.121(a)(6) states that no amendment may introduce new matter into the disclosure of an application. The original disclosure does not support the recitation of a data voltage Vdata from the signal line 310b or 410b electrically connected to the drain terminal of the switching transistor 310 or 410. In fact, claims 1 and 8 claim a source terminal of the switching transistor (310 or 410) electrically connected to a signal line (310b or 410b). Also, claims 15 and 26 recite a gate terminal of the driving transistor (320 or 420) electrically connected to a drain terminal of the switching transistor (310 or 410), not the signal line (310b or 410b).
